

nächtlich thränet

FACT SHEET 2009

Biography

nächtlich thränet (**NT**) is a progressive Thrash | Death Metal band from Zürich, Switzerland.

NT's roots reach back to the early nineties when the band was founded by a few young metal enthusiasts to follow the footsteps of Swiss metal innovators such as Coroner and Celtic Frost. Through the years, the band went through countless underground gigs and several line-up changes while musical skills steadily improved and the definite NT sound was approached. The band's demo CD, released in 2003, provided a first insight into NT's complex yet heavy compositions and their future potential. Despite further line-up changes (i.e. the departure of lead guitarist Kuzmic towards Disparaged resp. Cataract) NT kept on writing new and even more intriguing song material, refining their style and now are back with their first full-length album "Painking": A ten track groove monster packed with complex riffs, progressive rhythms and sick vocal lines unleashed by one of the most inventive metal bands that has ever come out of Switzerland. The massive sound of Martin Korth's production and the astonishing artwork of Thomas Ott do the rest.

Prepare...for the Painking!

Releases:

2009

"Painking"

yet unreleased

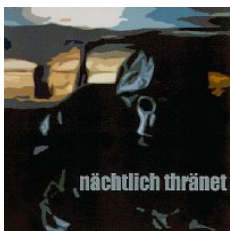

NT's first full-length album. Recorded and mixed by Martin Korth (Cataract, PX-Pain, Solid Ground, Teamkiller) at Eversound Recording Studios, Effretikon, Switzerland and mastered by Mandy Parnell (Depeche Mode, Sigur Ros, Moby, Fatboy Slim, Gotan Project), London. NT is currently looking for a label to release the Painking.

2003

"Demo"

self-released

Self-released demo CD. This album was recorded and mixed at baselcitystudios and mastered by Glenn Müller at the Greenwood Studios, Nunningen, Switzerland. The 500 copies made sold out in not time.

nächtlich thränet
